Art Unit: 3723

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a simulation method, classified in class 428, subclass unknown.
  - II. Claims 9-10, drawn to a control parameter or control program preparation method, classified in class 29, subclass unknown.
  - III. Claims 11-19, drawn to a simulation apparatus, classified in class 395, subclass unknown.
  - IV. Claims 20-21, drawn to a control parameter or control program preparation apparatus, classified in class 702, subclass unknown.
  - V. Claims 22-23, drawn to a method of polishing, classified in class 451, subclass 28.
  - VI. Claims 24-26, drawn to a polishing apparatus, classified in class 451, subclass 64.
  - VII. Claims 27-30, drawn to a computer readable recording medium, classified in class 369, subclass unknown.
  - VIII. Claims 31-38, drawn to a polishing system, classified in class 451, subclass 1.
  - IX. Claims 39-43, drawn to a semiconductor device manufacturing method, classified in class 438, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IX have separate utility such as use in other

Art Unit: 3723

methods such as methods of manufacturing or polishing elements that are not semiconductor devices or to control parameters or programs other than those disclosed in the instant application or to make calculations not encompassed in the present invention. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
